

## **EMERGENCY MEASURES REPORT**

**March 19, 2007**

Municipal Bylaw #3.4.8. was passed to establish and maintain a Municipal Emergency Measures Plan for the Municipality of Miltonvale Park. I was asked to be the Municipal Emergency Measures (MEM) Coordinator and was tasked with establishing a Municipal Emergency Measures Plan. This plan was developed, presented to Council and adopted.

As part of the plan, agreements were signed with local companies to allow the municipality to call on them in times of emergency. These include emergency shelter, use of equipment, transportation, etc. I am currently working with Community Council and Emergency Measures PEI to set up exercises to test the plan.

I am completing my annual update of the Emergency Measures Plan and will be renewing the agreements within the next few weeks.

Gary Robbins  
MEM Coordinator

### **North River Fire Department - 2006 Report**

The Community of Miltonvale Park receives fire protection from the North River Fire Department. The community feels that the fire protection that is provided is very adequate. On average, the community has about 10 calls per year and 2006 was no different. N.R.F.D. answered the call to two structures and eight car accidents. Our thanks go to the members of the fire department for the tremendous work they do.

Respectfully submitted  
Councillor George Piercey

### **QUEENS COUNTY REGIONAL LANDFILL - ANNUAL REPORT 2006**

#### **A. BACKGROUND**

The Queens County Regional Landfill (QCRL) was opened in July 1985 and replaced the East Royalty Landfill. The site, located in Miltonvale Park, was primarily a "bulk" and "non-burnable" waste handling operation utilizing conventional trenching systems.

This landfill was operated with a private sector contract on an 8.5 hour per day basis under the supervision of Island Waste Management Corporation (IWMC) as outlined in the July, 2001 operating agreement between the Government of Prince Edward Island, as represented by IWMC, and the Miltonvale Park Community Council (The Council).

The site closed for waste disposal in November, 2002.

## **B. LANDFILL COMMITTEE**

The agreement of 1984 which governed the operation of the site until the agreement of July 2001, outlined a five member landfill committee consisting of up to 3 members appointed by council and two members appointed by Island Waste Management Corporation.

The 2006 Committee was:

Mr. Don Aitken, (Chairman) Miltonvale Park  
Mr. Gerry Moore, Island Waste Management Corporation  
Kevin Curley, Island Waste Management Corporation

The Committee meets at the call of the Chair and in 2006 there were no meetings scheduled:

- The Committee and IWMC are continuing to work toward the provision of a water supply system to serve residents in the areas adjacent to the landfill. Pursuant to the agreement, IWMC will provide funding to cover the costs to add the area to the City of Charlottetown water system pending agreement from the City. It should be noted that the city water system was extended to the Sleepy Hollow Road/Lower Malpeque Road intersection in 2003.
- Private well water testing at homes in the immediate vicinity of the site continues to be provided by IWMC on an annual basis.
- The first phase of site finishing work has been completed and all areas are now grassed.
- Groundwater monitoring has been completed in November, 2006 and the results from this sampling are presented in the attached report.

## **C. SITE ACTIVITY 2006:**

There has been no activity at the site other than periodic usage by IWMC of the facility to store and move carts and roll-off containers. In addition, tree debris stored as a result of Hurricane Juan was chipped and removed from the site. This concludes the report on activity at the site in the year 2006.

Respectfully submitted:
