

QUEENS COUNTY REGIONAL LANDFILL ANNUAL REPORT 2008

A. BACKGROUND

The Queens County Regional Landfill (QCRL) was opened in July 1985 and replaced the East Royalty Landfill. The site, located in Miltonvale Park, was primarily a "bulk" and "non-burnable" waste handling operation utilizing conventional trenching systems.

This landfill was operated with a private sector contract on an 8.5 hour per day basis under the supervision of Island Waste Management Corporation (IWMC) as outlined in the July, 2001 operating agreement between the Government of Prince Edward Island, as represented by IWMC, and the Miltonvale Park Community Council (The Council).

The site closed for waste disposal in November, 2002.

B. LANDFILL COMMITTEE

The agreement of 1984 which governed the operation of the site until the agreement of July 2001, outlined a five member landfill committee consisting of up to 3 members appointed by council and two members appointed by Island Waste Management Corporation.

The 2008 Committee was:

Mr. Don Aitken, (Chairman) Miltonvale Park
Mr. Gerry Moore, Island Waste Management Corporation
Kevin Curley, Island Waste Management Corporation

The Committee meets at the call of the Chair and in 2008 there were no meetings scheduled:

- The Committee and IWMC are continuing to work toward the provision of a water supply system to serve residents in the areas adjacent to the landfill. Pursuant to the agreement, IWMC will provide funding to cover the costs to add the area to the City of Charlottetown water system pending agreement from the City. It should be noted that the city water system was extended to the Sleepy Hollow Road/ Lower Malpeque Road intersection in 2003.
- Private well water testing at homes in the immediate vicinity of the site continues to be provided by IWMC on an annual basis.
- The first phase of site finishing work has been completed and all areas are now grassed.
- Groundwater monitoring has been completed in November, 2008 and the results from this sampling are presented in the attached report.

C. SITE ACTIVITY 2008:

This year marked the continuation of a contract which will remove all used tire bales stored at the site. The first loads left the site December 1, 2007 to a recycler in Quebec, to date approximately 85% of the total have been shipped and it is expected all tires bales will be shipped within the next few months.

The property continues to be used periodically by IWMC to store and move Waste Watch carts and roll-off containers.

This concludes the report on activity at the site in the year 2008.

Respectfully submitted:

Gerry Moore, CEO - Island Waste Management Corp.
